

EDIBLE

PhotoCake®

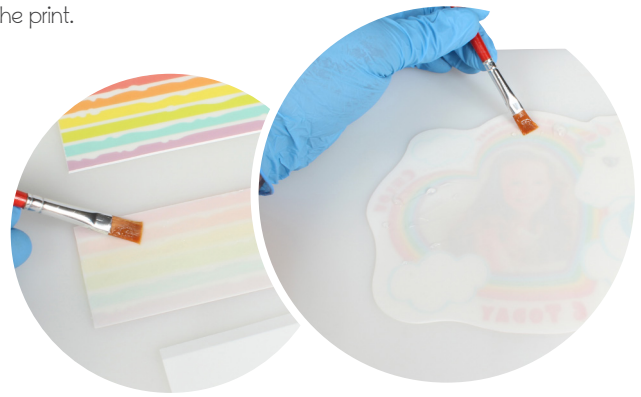

Perfect for me!

Caring for your Print.

Adhering PhotoCake® to cakes.

- 1 Cut out your PhotoCake® prints with a craftknife. Remember to always take care when using sharp blades.
- 2 Remove the backing paper by simply peeling it from the PhotoCake® sheet.
- 3 Turn over to the none printed side and using Cake Star edible glue, apply a thin layer using a paint brush. Pay particular attention to the edges of the print.

The moisture and heat from your fingers can smudge the image if held too long. When handling PhotoCake® try to wear gloves if you have them.

- 4 Be sure there are no large patches or "puddles of glue" on the reverse of the print, if so spread them out.

- 5 Position your Photocake print then gently press into place.

- 6 Using a cake smoother gently press the Photcake print flat to your cake.

- 7 Your creation is now ready to enjoy!
